DETAILED ACTION

1. This communication is in response to applicant's 09/14/2000 in the application of Calderone et al. for a "N-way demultiplexer".

Election/Restriction

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 17-23 drawn to the Demultiplexing single input channel to plural output channels: Subject matter having a means that derives a group of separate channels from a complex multiplex signal. Combining or distributing information via time channels: The Subject matter wherein information signals are communicated between stations by assembling or separating the signals via different time periods on a common transmission medium, classified in class 370, subclass 542.
 - II. Claims 8-13, 16, 24-29 and 32 drawn to the Demultiplexing single signal into plural parallel channels (e.g., parallel transmission for increasing transmission speed): Subject matter having a means that derive a group of separate channels from a complex multiplex signal. Combining or distributing information via time

Art Unit: 2665

channels: The Subject matter wherein information signals are communicated between stations by assembling or separating the signals via different time periods on a common transmission medium, classified in class 370, subclass 498.

III Claims 14-15 and 30-31 drawn to the Synchronization: The Subject matter including means for insuring that the transmission and reception of time multiplex information has a proper time relationship. Subject matter including a means for insuring that the transmission and reception of time multiplex information has a proper time relationship. Subject matter wherein information signals are communicated between stations by assembling or separating the signals via different time periods on a common transmission medium. classified in class 370, subclass 350.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the demultiplexing single inputs channel to a plural output channel, which does not include the particular listed of the invention II, such as Combining or distributing information via time channels wherein information signals are communicated between stations by assembling or separating the signals via different time periods. Invention III has separate utility such as the Synchronization

Art Unit: 2665

including means for insuring that the transmission and reception of time multiplex information has a proper time relationship which does not include the particular listed of the invention I and II. See MPEP '806.05(d).

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37.CFR 1.143).
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

Art Unit: 2665

or faxed to: (703) 308-9051, (for formal communications intended for entry)

Or: (703) 305-3988 (for informal or draft communications, please label "PROPOSED" or

"DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive,

Arlington. VA., Sixth Floor (Receptionist).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is (703) 305-1029. The examiner can normally be reached Monday through Friday from 6:30 am to 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner=s supervisor, Huy Vu, can be reached on (703)308-6602. The fax phone number for the organization where this application or proceeding is assigned is (703)305-3988.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3800/4700.
